

Redbud Trail Bridge Project

What you may see later this year

In late 2019 and into 2020, the project will move from Concept Phase to Design Phase.

As a result, you may notice various crews in the road and bridge vicinity gathering field data and information for design. Bridge maintenance activities will also take place in 2019.

Geotechnical Borehole Drilling for subsurface conditions

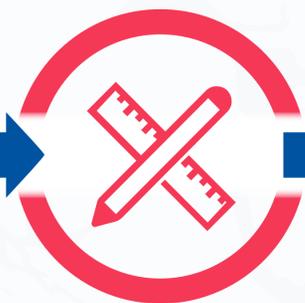

Survey Crews to identify topography and existing conditions

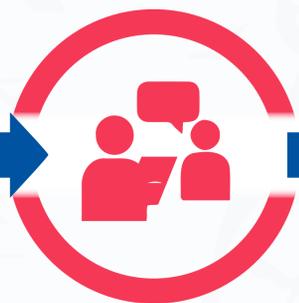

Environmental Field Staff to identify sensitive features

Project Next Steps
